CUSTOMER SERVICE

While CMC Howell Metal is known for quality products, we believe our strength lies in our commitment to customer service and relationships.

"Small enough to know you, large enough to serve you" is more than a slogan. It's the way we do business every day.

We will tailor our manufacturing and delivery systems to meet your needs.

We operate our own trucking fleet to provide quality service while keeping costs down. With a variety of trailers, our trucks can be loaded to meet your particular unloading needs, thus reducing your cost.

Our professional drivers will assist with unloading.

LINE SET ADVANTAGES

HIGH STANDARDS. CMC Howell Metal's line sets are manufactured to the highest quality standards. The copper tubing is manufactured in accordance with ASTM B280 standards and specifications and tested in accordance with ASTM E243 standards. The insulation is tested in accordance with ASTM E-84 standards and specifications. We anneal our tubing in the straight length form prior to insulating and coiling, insuring the most flexible line set available with no kinking during installation.

EASE OF INSTALLATION. Line sets have come into wide acceptance across the country because they offer a better way to field-connect air conditioning and heat pump systems. They may be ordered with straight ends or 90-degree bends to meet installation requirements.

ECONOMICAL. Line sets are available in lengths from 15 to 60 feet. The installer only purchases what is needed for each job, eliminating waste.

DURABLE AND EFFICIENT. Line sets are tough and tear-resistant. Continuous insulation eliminates seams that can open and cause dripping and decrease efficiency. Insulation is available in a variety of thicknesses to meet every insulation requirement.

CONVENIENT PACKAGING. CMC Howell Metal line sets and mini splits are packaged individually to protect the product. Each individual package is further protected by being placed in a master carton for shipping. The durable master cartons are stackable for warehouse use. Each individual package as well as the master carton are labeled with the item size and bar-coded to insure accurate and efficient identification.

MINI SPLIT LINE SETS AVAILABLE. CMC Howell Metal offers line sets for ductless mini split air conditioning systems. These "mini splits" arrive with both liquid and suction lines insulated. Available in lengths from 15 to 50 feet (five-foot increments), mini splits can be ordered with or without flare nuts on both ends.
